Reference: FCC MB DOCKET NO. 04-233

To Whom It May Concern:

I need your help! I understand the FCC wants to allow LPFM broadcasting that would dramatically affect my ability to receive K-Love Christian Radio on 88.9 FM out of Mrytle Beach/Wilmington, NC. **DO NOT ALLOW THIS ACTION!** As a citizen it is important that I am informed about local events that are free to the public and are of creative and uplifting nature instead of the usual distressing and even disgusting nature. Residents need to know what is actually positive and encouraging and K-Love has free postings for music and family events. The effect on the community would be distinct. I listen to K-Love and Christian Family Radio 90.5 FM on a daily basis and I consider it a serious part of my ability to even practice my religion.

With a world that is increasingly filled with fear, rage and disaster K-Love helps keep me focused on what I should be thinking about and not fear. Whose radio station prays for and with them? K-Love does! And I feel we all need prayer. It is in the public interest as I am actually a taxpayer and a responsible consumer. Regular radio does not provide a service for a committed Christian because of the profanity, disgusting jokes and general disregard for appropriate family fare that K-Love does provide.

Please do not forget us. K-Love is supported by monthly contributions like mine. We pay to keep our music and information about events for other Christians on the radio. I pay \$40.00 a month to support keeping them on the air. This is not a light interest radio station. This is a station that does not offend nor take advertisements for just any company. We also get decent lyrics from clothed entertainers, national news and international events that would not be inappropriate if "your mom was in the room with you."

If you have more questions please call K-Love 1-800-434-8400. Thank you for your help.

Respectfully,
